

HTC One Gets Smaller Sibling

Written by Marco Attard
19. July 2013

Customers with too small hands for [the 4.7-inch HTC One](#) might be interested in the HTC One mini, a smaller version of the smartphone with similar premium industrial design within an aluminium unibody.

Through bucking the "bigger is better" Android handset trend the HTC mini features a 4.3-inch 720p display, dual-core Snapdragon 400 processor (a downgrade from the quad-core number inside the One) and a smaller capacity battery.

Other HTC One features return-- namely BoomSound audio, BlinkFeed homes screen and Zoe gallery capabilities. Customers also get 25GB worth of free Dropbox storage for 2 years.

The HTC One mini starts shipping from August 2013.
