

Samsung Presents Tizen-Powered Z4

Written by Marco Attard
19. May 2017

Samsung has clearly not given up on the Tizen dream as it announces the Z4-- a smartphone powered by the OS promising to "combine performance and essential features with a simplified user experience."

Aimed at developing markets, the Z4 has fairly low-end specs. It features a 4.5-inch 480 x 800 resolution curved glass display, quad-core 1.5GHz processor, 1GB RAM, 5MP rear-/front-facing cameras and a 2025mAh battery. Connectivity comes through Bluetooth, LTE, VoLTE and VoWifi.

"We're dedicated to providing our customers with devices that offer smarter mobile interactions," the company says. "The Samsung Z4 brings a simplified mobile experience to first time smartphone users and represents our ongoing commitment to expanding the Tizen ecosystem."

The Z4 launches in "select countries," starting in India, from May 2017. It will be available in black, gold and silver depending on the market.
