The GetApp.com **Top 20 Business Apps** is based on a composite algorithm that incorporates several criteria, including listing popularity on GetApp.com, number of reviews and comments, social media presence such as Twitter and FaceBook followers, volume and quality of integration points, and input from analyst reports. The ranking is updated monthly.

OK, whenever you try to balance quantitative and qualitative factors, you do get a subjective result. But at least this is a list you can start from and decide for yourself.
