

Yarvik takes on the tablet market with a lightweight 7" Android, the TAB210.

It comes with Android 2.1, a resistive touch screen (800 x 480 resolution) and, rather unusually, a scroll wheel allowing users to scroll through their files. It comes with 4GB of memory (expandable via Micro-SD card) as well as a 600 MHz processor and 256 MB of RAM.

Meanwhile internet connections come via wifi.

The company claims its battery has a life of up to 4 hours for video (or up to 14 hours for music).
