

IDC: Q4 Tablet Shipments Reach "Record"

Written by Marco Attard
08. February 2013

Global Q4 2012 tablet shipments outpace forecasts with "record" totals according to IDC, as the market grows by 75.3% Y-o-Y and shipments reach 52.5 million units, up from 29.9m in Q4 2011.

Catalysts for such growth include lower average selling prices (ASPs), a wider product range and increased holiday spending.

Of course, tablets are a stark contrast to PCs-- where shipments saw declines during the holiday season, a first in over 5 years.

Apple continues to lead the market, with shipments reaching 22.9m units (wih 48.1% Y-o-Y growth) thanks to the iPad mini and 4th generation iPad launches. However increasingly strong competition continues to cause decline in Apple tablet share, from 46.4% in Q3 2012 to 43.6% in Q4.
