SanDisk launches the Extreme PRO SDXC UHS-1 memory card, the highest-capacity SD card on the market according to the company at 512GB, making it ideal for industry professionals and prosumers working in video and photography.

“4K/UHD is an example of a technology that is pushing us to develop new storage solutions capable of handling massive file sizes,” the company says. “The 512GB SanDisk Extreme PRO SDXC UHS-I card is a tremendous advancement that enables professionals to reliably store more content on a single card than ever before.”

As well as high capacities the Extreme PRO features write speeds of up to 90MB/s, transfer speeds of up to 95MB/s and UHS Speed Class 3 (U3) recording speeds for efficient post-production workflow.

It is also temperature-, water-, shock- and x-ray-proof, and SanDisk adds a download offer for RescuePRO Deluxe data recovery software.

The SanDisk Extreme PRO card is available now in 512, 256 ad 128GB sizes.
