

Duo-Link Storage from PNY

Written by Marco Attard
12. December 2014

PNY Technologies launches the Duo-Link On-The-Go (OTG), a pocket-size flash drive featuring both USB and micro-USB connectors, allowing for even easier file transfers and streamers between PCs and Android devices.

Available in either 16 or 32GB capacities, the Duo-Link is designed for customers wanting to free up the storage in their Android smartphones or tablets by transferring multimedia files to their PCs. Alternatively content in the Duo-Link can be accessed by mobile devices once it is connected.

The Duo-Link OTG is available now.
