Accessory maker Twelve South announces a version of the BookBook case fitting the latest iPhones-- the BookBook for iPhone 6, a 3-in-one case featuring a wallet, removable shell case and a hands-free viewing stand.

Like previous BookBook cases, the iPhone 6 version is made from "hand-distressed" leather complete with book-like stylings. A wallet allows one to hold cash and receipts, bank cards and IDs, while the removable shell allows one to separate the iPhone from the wallet part of the case.

Also built-in is a kickstand ideal for hands-free FaceTime chats and media viewing.

"We felt challenged to design a case that could do it all, and this new BookBook accomplishes that goal beautifully," Twelve South says. "Our biggest BookBook fans and supporters have been waiting a long time, and they will not be disappointed."

The new BookBook is available in iPhone 6 and 6 Plus versions in either brown or black.
