

Mophie Upgrades Space Products

Written by Marco Attard
17. April 2015

Mophie adds the Spacestation, Space Pack for iPad mini and Space pack for iPhone 6/6 Plus to its Space portfolio of iOS device storage-enhancing accessories, together with a revamped Space 2.0 app.

Space products combine external storage with battery cases, with the app handling file transfers between iDevices, PCs and even Android devices via wifi and secure online portal.

The Spacestation is akin to an external HDD, if with the addition of a 6000mAh internal battery and 2.4A of power. It provides 128GB of storage, while USB connectivity allows for use with PCs, Androids (4.4+) and Macs as well as iDevices.

The Space Pack for iPad mini also offers 128GB of storage together with a 7000mAh battery, while the Space Pack iPhone 6 carries a 3300mAh battery and either 64 or 128GB of storage.

All the above mentioned Space products ship from May 2015.
