

DODOcase Intros Watch, iPhone Dock

Written by Marco Attard
24. April 2015

DODOcase launches a solution for customers wanting to simultaneously charge their iPhone and Watch-- the Dual Charging Dock Organiser, a product featuring the company's signature book-bound cover style.

Construction is in Baltic birch wood tray, with steel inserts for the storage of chargers and cables. A groove in the rear section holds the iPhone in place, while a round cutout on the front holds the Watch magnetic induction charger.

One can open the hollow dock for easy cable routing and storage of power adapters, headphones, straps and other accessories.

The Dual Charging Dock Organiser ships from May 2015 in either "Indigo/Harbour" or "Charcoal/Dove" colours.
