

Mophie Battery Case Gets Waterproof

Written by Marco Attard
15. May 2015

Mophie launches a battery case addition ideal for the summer season-- the Juice Pack H2PRO, a version of the earlier Juice Pack Air battery case for the iPhone 6 as updated with waterproofing and device protection.

The Juice Pack H2PRO carries a 2750mAh external battery as combined with IP-68 and MIL-STD 810G rated protection against drops, dirt and water. Construction is in "multiple layers of shock-absorbing materials," ports are water-tight and the display gets a built-in protector.

Mophie says the case protects against water at of up to 1.2m for 30 minutes. Meanwhile the screen protector allows regular use of all functions (including buttons and Touch ID) as it defends against scratches and glare.

The battery comes complete with LED power indicators, and users can switch it on or off as required.

The Mophie Juice Pack H2PRO should ship from late May 2015.
