

Emtec Presents Weya Wireless Storage

Written by Marco Attard
29. April 2016

Emtec announces WEYA (Wherever You Are)-- a lineup of portable wireless multimedia storage devices consisting of the GoPhoto, GoMusic and GoMovie products, all complete with rechargeable batteries and companion apps.

Designed to allow file access while on the go, WEYA devices create an own wifi network for the easy file backups without need for an internet connection. In addition users can also access and organise files, as well as stream audio or video, through free apps.

"The WEYA line is a travel companion for your mobile devices, ensuring you never run out of storage or lose precious memories again," the company says. "The focus is on simplicity, ensuring all of your content is backed up and readily available, wherever you are."

As mentioned earlier Emtec currently offers 3 WEYA devices-- the 1TB GoMovie, 64GB Bluetooth speaker-compatible GoMusic and the 64GB GoPhoto. All are available from Q3 2016.
