Monster announces a portable power products lineup-- the Home Collection, aluminium-clad devices featuring rapid USB charging within designs complementing home and office decor.

The collection offers 3 charging stations, Large, Medium and Small, each with x4 USB ports, built-in stand, built-in cord management and LED night lights. The large version adds x4 power outlets for electrical devices while the medium has two plugs, and the two chargers also include Monster's Fireproof MOV surge protection technology.

The small version lacks in power outlets and surge protection.

A final Home Collection product is the Wall Tap-- a charging station one can plug direction into wall outlets to add x3 rapid charge USB ports.

The Home Collection is available now.
