The Belkin 3.5mm Audio + Charge RockStar is a fairly self-explanatory accessory-- it is means to add a headphone jack to Lightning-only devices, while providing a source of data or power.

The MFi-certified product is compatible with any 3.5mm audio source, and handles remote and mic control via headphones. It also supports 12W passthrough charging, meaning the iPhone juices up at maximum speeds. As such it is ideal for use with the latest iPhones lacking a 3.5mm headphone jack, namely the iPhone 7, iPhone 7 Plus, iPhone 8, iPhone 8 Plus and upcoming iPhone X.

The 3.5mm Audio + Charge RockStar adapter is available now.
