Twelve South believes iOS devices deserve an "ultimate pedestal"-- specifically the HiRise for iPhone 5/iPad mini, a brushed metal stand for iDevices equipped with Lightning connectors.

Compatible with the iPhone 5, iPad mini, iPod Touch and iPod nano, the stand raises the smaller iOS offerings to face level, making it ideal for video chats and media consumption.

It also holds devices clad in protective cases through adjustable rear support and multiple-height clips.

The HiRise stand is available now.
